PROFESSIONAL SUMMARY

Skilled flutter developer with over 2 years of experience in creating scalable, high-performance cross-platform mobile and web applications. Specializes in real-time systems, secure payment integrations, and clean architecture patterns. Delivered production-ready applications utilizing firebase integration, restful apis, and advanced state management solutions.

EXPERIENCE

Mobile Application Developer **02/2024 – Present**
Maxcore Technologies **Multan**

- Developed and maintained cross-platform mobile applications using Flutter.
- Collaborated with UX/UI designers to enhance application usability and visual design.
- Integrated RESTful APIs for seamless data exchange between mobile applications and backend services.
- Conducted code reviews to ensure adherence to best practices and improve software quality.
- Implemented automated testing frameworks to increase application reliability and reduce bugs.

TECHNICAL SKILLS

Languages & Frameworks
Flutter, Dart, Android, iOS, Cross-Platform Mobile Development

State Management & APIs
Bloc, Riverpod, GetX, RESTful APIs, Dio, JSON, API Integration

Firebase & Databases
Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging (FCM), Firebase Storage, SQLite, Hive, SharedPreferences

Tools & Platforms
Google Maps, Geolocator, WebView, Git, GitHub, Android Studio, Visual Studio Code, Xcode, Postman, Google Play Console, App Store Connect

Development
Responsive UI Development, Material Design, Payment Gateway Integration, Push Notifications, Performance Optimization

FEATURED PROJECTS

GateLine / HostLine
Community Security & Visitor Management System

- Developed a community security and visitor management application using Flutter.
- Implemented QR code and ID verification for secure visitor authentication.
- Integrated REST APIs and Firebase services for real-time data synchronization.
- Implemented Riverpod for efficient state management and scalable application architecture.
- Developed push notification functionality for visitor approvals and security updates.
- Designed responsive and user-friendly interfaces following Material Design principles.

Suraj Studio
Booking & Billing Management System

- Developed a cross-platform booking and billing application using Flutter.
- Implemented appointment scheduling and billing management features.
- Integrated SQLite for local data storage and offline functionality.
- Developed image upload and media management features.
- Integrated REST APIs for data synchronization and business operations.
- Optimized application performance and user experience.

Faster
Real-Time Delivery Tracking Application

- Developed a real-time delivery tracking application for drivers and customers.
- Integrated Google Maps and Geolocation services for live location tracking.
- Implemented REST API integration for order management and delivery updates.
- Developed real-time synchronization using Firebase services.
- Built responsive user interfaces for delivery tracking and order management.
- Improved application performance for smooth real-time updates.

ExtBuy & Sourcesin
Multi-vendor e-commerce platform

- Developed and maintained cross-platform multi-vendor e-commerce applications using Flutter.
- Integrated REST APIs for product, order, and user management.
- Implemented secure payment gateway integration.
- Developed product catalog, shopping cart, wishlist, and order management features.
- Optimized application performance for handling large datasets and smooth user experience.
- Collaborated with backend developers to implement scalable mobile solutions.

EDUCATION

Ghazi University **2019 – 2023**
Bachelor of Science in Computer Science (BSCS) **Dera Ghazi Khan, Pakistan**

CERTIFICATIONS

Flutter Development Course
Softzone IT Solutions (DGK) | July 2023 – Nov 2023

- Completed comprehensive training in Flutter and Dart.
- Built cross-platform Android and iOS applications.
- Learned REST API integration, Firebase, local storage, and state management.

Flutter Development
Eleciam (Multan) | Dec 2023 – Jan 2024

- Completed advanced Flutter application development training.
- Gained practical experience in responsive UI development, API integration, and production-ready mobile application development.
